D.R Congo
Situation Report

Humanitarian Response Scale up: Ituri, North Kivu and South Kivu Provinces

1 to 31 July 2023
Humanitarian context

- Ongoing fighting and recurrent natural disasters in the East of the DRC have displaced around **5.5 million people** in North Kivu, South Kivu and Ituri provinces. Many of those who have been displaced are living in overcrowded sites and collective shelters outside of Goma, women and girls’ women and girls’ risks of unintended pregnancies, maternal death and gender-based violence.
- Around **5.87 million** people need health assistance in the east of the country, where the health system is at breaking point as a result of overlapping outbreaks of COVID-19, measles, polio, meningitis, and monkey pox. Yellow fever, cholera and malaria are all on the rise due to a lack of access to safe water and sanitation for those on the move.
- On 16 June 2023, an IASC System-Wide Scale-Up was activated for eastern DRC to strengthen the response of humanitarian actors.

Situation overview

Sexual and reproductive health
Access to Sexual and Reproductive Health services remain extremely challenging for as estimated **220,000 women** who are currently pregnant. **55,000 women** are expected to deliver in the next 3 months.

Before the escalation of violence, the country’s health infrastructure was weak, with one of the highest maternal mortality rates in the world. Access to maternal and newborn care including emergency obstetric care and family planning are limited and women are unable to obtain post-exposure prophylaxis for HIV in part due to a lack of awareness about available services, stock outs and costs. The crisis is also exacerbating food insecurity around **2.2 million pregnant** and lactating women will face acute malnutrition in DRC in 2023.

Gender-based violence
Sexual violence has soared in Eastern DRC in 2023. Women and girls living in displacement sites have reported that they are at risk of rape and sexual assault, exacerbated by the need to travel outside of camps in search of supplies for their basic needs and for domestic purposes and work. There are also reports of displaced women and girls who are forced to trade sex for survival, including in IDP sites. For survivors of sexual violence, access to comprehensive medical and psychosocial support is limited, especially for those seeking judicial and legal services or socio-economic support.
Key statistics

5,5 million
Internally displaced persons in Ituri, North Kivu and South Kivu provinces, Eastern DRC

1,375,000
Women of reproductive age impacted (estimated)

220,000
Pregnant women

313,478
Women at risk of GBV

6 Months
Scale up duration

Target of humanitarian assistance

1,375,000
Population targeted by UNFPA

Coordination

• UNFPA leads the Gender-Based Violence Area of Responsibility (GBV AoR). During the reporting period, the GBV AoR held two meetings in North Kivu to coordinate the response of partners to meet the identified needs of GBV survivors. Discussions were centred on how to fill the gap between needs and assistance until the scheduled end of the scale up in December 2023.

Sexual and reproductive health

• UNFPA is leading efforts to ensure displaced women and girls can access reproductive health and protection services and is currently supporting 31 service delivery points in the 3 provinces of North Kivu, South Kivu and Ituri with reproductive health supplies and medical personnel. This includes 24 health facilities, 3 centres for the holistic management of GBV, and 4 women and girls’ safe spaces that provide social reintegration activities.

• UNFPA is supporting 3 mobile clinics in Bulengo, Rusayo and Bujari IDP sites in North Kivu province and has deployed 8 midwives to ensure that women and girls can access critical maternal health services. There are plans to recruit and deploy additional midwives to mobile health teams, including community based distributors of modern family planning methods to meet the reproductive health needs of displaced populations.
**North Kivu province**

**Target Health Zones (HZ)**
HZ supported by UNFPA and IPs: Territories of Masisi (Kiroshe HZ & Masisi), Rutshuru (Kibirizi HZ), Beni (Mutwanga HZ, Oicha HZ) Nyiragongo (Nyiragongo HZ), Lubero (Kayna HZ & Alimbongo), Goma town (Goma HZ, Karisimbi HZ)

**Key data of 3 mobile clinics**: Bulengo, Rusaya and Bujari IDPs Camps

Reproductive health kits, dignity kits and contraceptives distributed to mobile clinics and health centres covering IDP sites, as well as collective centres in North Kivu.
UNFPA Reproductive health response: July 2023

**South Kivu province**

**Target Health Zones (HZ)**
Kalehe territory (Kalehe and Minova HZ) and Fizi territory (Nundu and Fizi HZ)
Delivery of reproductive health kits to the Bushushu health centre in the Kalehe HZ in South Kivu. The kits included individual delivery kits, post-rape kits, oral and injectable contraceptives, as well as medicines and clinical delivery aids.

**Ituri Province**

**Target Health zones (HZ)**
Territories of Djugu (HZ of Drodro, Fataki, Lita, Linga et Nizi) and Mahagi (HZ of Aungba, Kambala and Logo, Mahagi), Irumu (Gethy).

- **659** safe deliveries attended by qualified personnel
- **617** live births attended by skilled health personnel
- **14** obstetric complications managed
- **54** caesarean sections performed
- **331** new family planning users recruited
- **458** sexual transmitted infections cases treated
- **3,739** people reached by awareness raising on sexual and reproductive health
- **78** community leaders sensitized on SRH themes
### Gender Based Violence

- **850** individuals received Psychosocial Support
- **764** individuals received medical care and **18** received legal support
- **181** Dignity kits distributed to survivors and vulnerable women and girls
- **20,445** people informed about available GBV services
- **3** Gender-Based Violence safety audits undertaken in Masisi, Kirotshe and Goma health zones

### Protection from Sexual exploitation and abuse

- **140** individuals trained in psychological first aid and medical care in Goma, Bukavu, Beni and Bunia
- **3** risk assessments undertaken on the Prevention of Sexual Exploitation and Abuse
- **2** community-based complaint mechanisms set up in Masisi (Mbitsi and Mpanane)
- **50** health providers from Mahagi and Djugu territories trained in the clinical management of rape
- **16** GBV actors trained in case management in North Kivu
- **106** individuals received medical and psychosocial care for sexual exploitation and abuse, including as a result of the complaints management mechanism in the 3 provinces
- **20,370** people informed on the Prevention of Sexual Exploitation and Abuse
- **73** : survivors received group therapy in the 3 provinces
- **140** : individuals trained on psychological first aid and medical care in Goma, Bukavu, and Beni.
Challenges

- Inadequate funding is hampering UNFPA DRC’s response, including economic reintegration gaps, which help mitigate the risks of negative coping mechanisms (transactional sex and child marriage).
- Access to certain areas (mainly in Rutshuru and Irumu) in the provinces of North Kivu and Ituri is very limited due to insecurity.
- The operational presence of protection actors in the East of DRC is weak. These limitations are exacerbated by insufficient technical and financial capacity for the provision of quality and holistic services for survivors of gender-based violence to address the clinical management of rape, psychosocial support, legal support and socio-economic reintegration.

Funding status

UNFPA is appealing for $18,850,000 until the end of 2023 to scale up reproductive health and protection services to reach the most vulnerable women and girls in North Kivu, South Kivu and Ituri. To date, the appeal is only 22 percent funded ($4,192,525).

Flexible and timely funding will ensure that UNFPA and its partners can establish more mobile clinics, safe spaces, and distribute life-saving supplies and support the deployment of additional critical personnel (humanitarian midwives, GBV case managers...). These services delivery points will address the management of clinical rape and obstetric emergencies, and support women and girls’ safe spaces, even in the most impacted and hard-to-reach areas.

US$4,192,525 (Funds mobilized)
US$18,850,000 (Funds required)
US$14,657,475 (Funding gap)
Marie, a 40-year-old woman, was raped by three (3) armed men in front of her children in the forest when she fled her village at the start of the war. «The war started in Kishanga and we heard the crackling of bullets. We left our homes and went into the forest, hoping for a lull» says Marie. As the situation worsened, she decided to flee with her four (4) children and another woman. On the way, they came across three armed men. They tied up her children. «I resisted, but one of the soldiers pointed the gun to kill me... I had to accept in order to survive. But the pregnant woman was shot dead», added Marie. As Marie was the only woman left, she was raped by all three armed men. «The last one tried to put a beer bottle in my private parts. Afterwards, they untied the children and left at around 7pm», concluded Marie. One of her sons carried her on his back as they fled. After spending a night in a bush, the group reached a main road, where they saw a driver who usually ate in her restaurant in Kishanga. The driver took them to Goma. Marie was then directed to the Bulengo site, where she spent the first night before getting materials to build a makeshift shelter. Marie received medical treatment at the Bulengo mobile clinic set up by UNFPA, after which she was referred to a nearby safe space for psychological care and socio-economic reintegration.
